HOW IT WORKS

SOUND FAMILIAR?

Posting every day is a full-time job.

No time
You know you should post daily, but the shop, the orders and the customers come first.

No designer
Good designs take hours, or cost money every single month.

A quiet page
When your page goes quiet, customers stop seeing you, and buy from the shop that posted today.

THE FIX

Set it up once. Post forever.

1

Tell us about you

Your products and prices, logo, colours and the way you talk to customers. Once.

2

Your daily playlist

Every day, tomorrow's posts and stories are planned. Change any idea or time if you like.

3

Designed and published

Everything is designed overnight and goes out on time to Facebook and Instagram.

WHAT YOU GET

✓ **Designs in your brand**
Your logo, your colours, your style. Posts that look like you, not like a template.

✓ **Your customers' language**
Choose the caption language and the language on the picture separately. Sinhala, Tamil, English or Singlish.

✓ **Never invents a price**
Only prices and offers you saved are used. A number it can't check is left out.

✓ **Every post on your WhatsApp**
See each post with its caption before it goes out, and a note when it is live.

✓ **You stay in control**
Change the idea, redo the design, move the time, or delete it, even after it is published.

✓ **Push your offers**
Add a weekend offer or a special day, and your posts promote it first.

🤝 **We set it up for you.** We connect your Facebook Page and Instagram, and help you switch Instagram to a business account. No technical steps on your side.

Your page, busy from tomorrow.

Message us and we get you started.

Do I have to do anything every day?

No. Posts go out by themselves. Check them on WhatsApp if you like, or turn on approval and nothing goes out until you say yes.

What do I need to start?

A Facebook Page. For Instagram, a business account linked to that Page. We connect both for you.

Can it get my prices wrong?

It only uses the prices and offers you give us. If a number can't be checked, it is left off the design.

What if I want my own photos?

Upload them to your photo library. You can also redo any design or change the idea behind it.

Ready? Send “POST” on WhatsApp.

We set up your page, your brand and your first week of posts.
