Retexia Post

Product summary and sales playbook: what we built, how it works for a customer, and how to sell it on a call and on WhatsApp.

In one sentence

Retexia Post runs a small business's Facebook and Instagram for them: every day it writes the ideas, designs the posts and stories in Sinhala, English or Tamil, publishes them on time, and sends the owner each post on WhatsApp first.

Inside	
1. What Retexia Post is	6. The selling approach
2. What we built	7. Phone call script
3. A day in the customer's life	8. WhatsApp texting script
4. Plans and prices	9. Objections and answers
5. Who to sell to	10. After the yes: onboarding checklist

Prices in this playbook are the ones set up on the website (LKR). Check the admin before quoting, in case they were changed.

1. What Retexia Post is

Most small businesses in Sri Lanka know they should post every day, but they don't have the time, a designer, or the ideas. Their page goes quiet for weeks, then they post a blurry photo with no price. Retexia Post fixes that without them doing anything.

The promise

- **Every day, done for you.** Up to 5 posts and 5 stories a day, depending on the plan.
- **Designed in their brand.** Their colours, their logo, their real products and prices.
- **In their language.** Sinhala, Sinhala + English, Singlish, English or Tamil, chosen separately for the caption and for the text on the picture.
- **They stay in control.** Every post comes to their WhatsApp first. They can change, redo or delete anything, even after it's published.
- **On time, without them.** Posts go out automatically at the times they choose. If they do nothing, the page still stays active.

What makes it different

Typical option	Problem	Retexia Post
Owner posts by themselves	No time, no ideas, irregular, no design	Posts every day without the owner's time
Freelance designer	Costly per post, slow, waits for instructions	Designs ready every morning, a fixed monthly price
Social media agency	Expensive, long contracts, slow changes	Low monthly plan, change anything in seconds
Generic AI tools	English only, no posting, no business details	Sinhala/Tamil, real products and prices, posts for you

> **Safe by design:** prices, discounts and phone numbers only come from the business's own details. If a number can't be checked, Post leaves it out instead of inventing it.

2. What we built

A complete product: the customer panel, the automation, the admin, the payments and the website.

For the customer (post.retexia.com)

Feature	What it does
Daily playlist	Each day has its own playlist of posts and stories. The customer picks how many (within the plan) and their times. 7 days visible.
Automatic planning	At the planning time (6 AM by default, changeable), tomorrow's ideas are written: one per slot, using offers, the week plan and the products. Today's empty slots are filled too.
Designing	From midnight, every idea becomes a finished design (4:5 post or 9:16 story) with caption and hashtags, ready by 6 AM.
Languages	Caption: Sinhala, Sinhala + English, Singlish, English, Tamil. Text on the picture: Sinhala, English, Tamil. Set per business and per post.
What it's about	Each post is about one product, a group of products (e.g. "Cakes"), or the whole business. Auto posts pick a product or the business at random.
Full control	Change the idea, design now, redo with feedback (wrong product, new picture, new caption), change the time, approve, delete.
After publishing	Change the Facebook text, or delete the post from Facebook and Instagram from the panel.
New post	Something extra outside the playlist: describe it, publish now or at a chosen time.
Publishing	Automatic by default, for every business type. Can be switched to approval-only.
WhatsApp messages	Each post/story picture with its caption when it's ready, a note when it's live, and an alert if something needs the owner. Quiet hours respected.
Products, groups, brand	Products with prices, product groups, brand colours, logo, tone, words to use and avoid, "About your business".
Week plan and offers	Tell Post about a sale or a holiday; it plans the posts around it.
Pause	Holiday mode: nothing is planned or published until it's switched back on.

Behind the scenes

- **The website decides, n8n does the work.** post.retexia.com decides what happens and when. The n8n workflow only does the jobs: planning, designing, publishing, deleting, editing, WhatsApp. Light and fast, ready for many customers.
- **Meta access per customer, kept in Supabase.** Retexia adds each customer's Page token once (encrypted in Vault). No Meta keys on the website; no app review needed while Retexia manages the Pages.
- **Reliable publishing.** One publication per account, never posted twice. Temporary errors retry after 2, 5, 15 and 30 minutes. Lost access marks the account "reconnect needed" and tells the owner.
- **Admin panel (admin.retexia.com).** Every business with its plan, accounts, publishing health, AI usage and cost. Pause one business or everything at once. Customer emails on every status change.
- **Payments.** PayHere (Sri Lanka) for card payments and renewals; plans activate automatically after payment.
- **Tested.** 260+ automatic database checks cover security (customers only see their own data), planning, publishing, retries and WhatsApp.

3. A day in the customer's life

This is the story to tell on a call. Customers buy the outcome, not the technology.

Time	What happens	What the owner does
Yesterday 6:00 AM	Today's ideas were written: e.g. 2 posts and 2 stories, using their products, offers and week plan.	Nothing (they can change any idea).
12:00 midnight	Every post and story is designed: picture, caption, hashtags, in their language.	Sleeping.
7:00 AM	Each design arrives on their WhatsApp with its caption and publish time.	Looks while having tea. Taps the link only if they want a change.
9:00 AM, 1:00 PM, 7:00 PM ...	Posts and stories go live on Facebook and Instagram at their times.	Nothing. Gets "it's live" on WhatsApp.
Any time	New offer? A holiday? Out of stock?	Adds it in the panel or says "New post". It's designed in about a minute.
6:00 AM	Tomorrow's playlist is written again.	Nothing.

The line to remember: "Your page posts every day, in Sinhala, with your real prices, and you only spend 2 minutes looking at it on WhatsApp."

4. Plans and prices

	Starter	Growth (most popular)	Pro
Monthly	LKR 5,900	LKR 14,900	LKR 29,900
Yearly (2 months free)	LKR 59,000	LKR 149,000	LKR 299,000
Posts + stories a day	Up to 2 + 2	Up to 3 + 3	Up to 5 + 5
AI designs a month	130	200	330
Redos a month	60	200	500
Accounts	Facebook Page + Instagram	4 accounts	10 accounts, up to 3 businesses or branches
Week plan	-	Yes	Yes
Support	WhatsApp	Priority WhatsApp	Same-day

All plans: Sinhala/English/Tamil captions and designs, offers and special days, edit/redo/delete even after publishing, WhatsApp previews. No setup fee. Value framing: Starter costs about LKR 200 a day, less than one boosted post, for up to 4 designed posts and stories every day.

5. Who to sell to

Best-fit customers (start here)

- Businesses that sell through Facebook/Instagram and WhatsApp: home bakers, cake shops, clothing and boutique stores, cosmetics, phone accessories, restaurants and cafés, salons, gift shops.
- They have a Page but post rarely, or the owner does it all by phone at night.
- They have clear products with prices (easy to make good posts).
- Sinhala-speaking owners and customers: our Sinhala captions and designs are a strong reason to choose us.

Signals of a hot lead

- Last post more than a week ago, or posts with no price or poor photos.
- Runs boosted posts (already spends money on Facebook).
- Many comments asking "price?" or "how to order?" (they're losing sales).
- Mentions being busy, having no designer, or a designer who is slow or expensive.

Before you contact them (5 minutes, makes the sale)

- Look at their Page: products, prices, last post date, language they use.
- **Make 2 sample posts for them** with Retexia Post ("New post" on a demo business with their name, logo and a real product), in Sinhala. A finished design with their own product is the strongest selling tool you have.
- Note one specific thing to compliment (a product, a review, a good photo).

6. The selling approach

Principle	How to use it
Show, don't tell (demo first)	Send their own sample post before talking price. People buy what they can see.
Discover the pain (SPIN)	Ask about their Situation, the Problem, its Impact (lost sales, stress), and the Need-payoff ("what would it mean if...").
Sell the outcome	Talk about "more people messaging to order" and "no stress at night", not AI, n8n or Graph API.
Anchor the value	Compare with what they spend now: a designer, an agency, their own time, boosted posts.
Make it easy to say yes	Starter plan, no setup fee, cancel any time from their account, Retexia connects the Page for them.
Give a choice, not a yes/no	"Starter with 2 posts a day, or Growth with 3?" (choice close).
Use honest urgency	Real reasons only: an upcoming season (Avurudu, Christmas, Vesak), a limited number of onboarding slots this week.
Follow up	Most sales happen after the 2nd to 5th touch. Polite, useful follow-ups (a new sample, a tip).
Be honest	Never promise a number of sales. Promise daily, professional posts in their language and their time back.

7. Phone call script

10 to 15 minutes. Speak in the customer's language: lines are in English with Singlish versions for Sinhala-speaking customers. Smile while you talk: it can be heard.

Step 1 · Opening and permission (30 seconds)

You: Hi, is this Nimal from Nimal Cakes? This is Lakshan from Retexia. I saw your Facebook page, your chocolate cake photos are really good. Do you have 2 minutes?

You: *Singlish:* Hello, Nimal Cakes da? Mama Lakshan, Retexia eken. Oyage Facebook page eka dekka, chocolate cake photos godak lassanai. Viniththu 2k katha karanna puluwanda?

Step 2 · Reason for the call (20 seconds)

You: We help small businesses keep their Facebook and Instagram active every day, without the owner spending time on it. I made two sample posts for your cakes, in Sinhala. Can I send them on WhatsApp while we talk?

Step 3 · Discovery: let them talk (3 to 5 minutes)

- **Situation:** "Who does your posts now? How often do you post?" / "Danata posts danne kauda? Kopamana parak danawada?"
- **Problem:** "What's the hardest part: ideas, design, or finding the time?"
- **Impact:** "When the page is quiet for a week, do you notice fewer orders or messages?"
- **Need-payoff:** "If your page posted every day with your real prices, and you only checked it on WhatsApp, what would that mean for you?"

Write down their exact words. Use them later: "You said you post at 11 PM after closing..."

Step 4 · Show the samples and the day (2 minutes)

You: Have a look at the two posts I sent. That's your cake, your price, in Sinhala. Every morning you'd get posts like these on WhatsApp, and they go out by themselves at 9, 1 and 7. If you want a change, you tap the link and change it, even after it's posted.

You: *Singlish:* Me post deka balanna. Oyage cake eka, oyage price eka, Sinhalen. Hama udema mehema posts WhatsApp ekata enawa, ewa time ekata automatically post wenawa. Wenas karanna one nam link eka obala wenas karanna puluwan.

Step 5 · Value and price (1 minute)

You: Most businesses start with Starter: up to 2 posts and 2 stories every day, for 5,900 rupees a month. That's about 200 rupees a day, less than one boosted post. Shops that sell more often take Growth, 3 and 3 a day.

Step 6 · Close: give a choice

You: Would you like to start with Starter, or go with Growth for more posts? I can set it up today, and your first posts would be ready tomorrow morning.

You: *Singlish:* Starter eken patan gannada, nathnam Growth da? Ada setup karala dennam, heta udema oyage first posts ready wela thiyei.

If they hesitate, ask "What's making you unsure?", then answer that one thing (see section 9). Stop talking after you ask for the decision.

Step 7 · Next steps (when they say yes)

- Send the payment link (PayHere) on WhatsApp while still on the call.
- Ask them to add your Facebook account to their Page (Content access) and to link their Instagram Business account.
- Ask for logo, 5 to 10 products with prices, and their WhatsApp number for previews.
- Confirm: "Tomorrow at 7 AM you'll get your first posts on WhatsApp."

8. WhatsApp texting script

Short messages, one idea each, always with something to look at. Send the sample first, the price later. Never send more than 3 follow-ups without a reply.

Day 0 · First message (with 2 sample designs)

You
Hi Nimal! I'm Lakshan from Retexia. I liked your chocolate cakes on Facebook, so I made 2 free sample posts for your page, in Sinhala. Have a look

You
[Image: sample post 1] [Image: sample post 2]

You
We make posts like these for you every day and publish them on Facebook and Instagram automatically. Would something like this help your page?

If they reply with interest

Customer
Lassanai! Kohomada meka wada karanne?

You
Thank you! Very simple:
1. Every morning you get the day's posts and stories on WhatsApp
2. They go live at your times (e.g. 9 AM, 1 PM, 7 PM)
3. Want a change? Tap the link, change it in seconds

Captions in Sinhala, English or Tamil, with your real prices.

You
Can I call you for 5 minutes today to show you? What time is good, 12 or 4?

If they ask the price

You
Starter is LKR 5,900 a month: up to 2 posts + 2 stories every day, designed and posted for you. About LKR 200 a day. No setup fee, cancel any time.
Growth (3 + 3 a day) is LKR 14,900.
Which one fits your page better?

Follow-ups when there's no reply

Day 1
Hi Nimal, one more sample for you, this time a story for the weekend [Image]. Shall I set up your page so posts like this go out every day?

Day 3
Quick tip: the more often customers see your products, the more likely they are to message you to order. Daily posts keep your cakes in front of them. Happy to set yours up this week, just reply "OK"

Day 7
Hi Nimal, I'll stop messaging after this one. If you'd like daily posts in Sinhala for your page any time, just reply here. Wishing you lots of orders!

Closing message (when they say yes)

You
Great! Here's how we start:
1. Pay here: [PayHere link]
2. Add me to your Facebook Page (Settings > Page access > Content)
3. Send your logo + a few products with prices

Your first posts will be on your WhatsApp tomorrow at 7 AM

Singlish version of the first message

You
Hi Nimal! Mama Lakshan, Retexia eken. Oyage chocolate cakes Facebook eke dekka, page ekata free sample posts 2k hadhuwa, Sinhalen. Balanna Hama dawasema mehema posts hadala Facebook, Instagram walata automatically post karanawa. Oyage page ekata udaw wei da?

9. Objections and answers

Agree first, then answer, then ask a question. Never argue.

They say	You answer
"It's too expensive."	"I understand. What do you spend now on posts: a designer, boosts, your own time? Starter is about 200 rupees a day for up to 4 designed posts and stories. One extra order a week usually covers it. Shall we start with Starter?"
"I do my posts myself."	"That's great, and you know your products best. How much time does it take each day? With Post you keep full control: you get every post on WhatsApp first, you just don't have to make them."
"AI posts look fake."	"Fair point, that's why I made samples with your own products and prices. Did those look fake? And you can redo or change any post before it goes out."
"Will the Sinhala be correct?"	"Captions are written in natural, everyday Sinhala. On the pictures, AI sometimes gets a letter wrong, so every design comes to your WhatsApp first; one tap makes a new version."
"I don't want to give my password."	"You never give a password. You add us to your Page with Facebook's own Page access, and you can remove us any time."
"Will it bring sales?"	"No one can honestly promise a number of sales. What we promise is a page that's active every day with your real products and prices, so more people see them and message you."
"Let me think about it."	"Of course. What part do you want to think about: the price, or how it works? ... Shall I make you one more sample for the weekend in the meantime?"
"I need to ask my partner."	"Sure. I'll send you a short summary and the samples to show them. When can we talk again, tomorrow evening?"
"Can I try first?"	"Yes: there's no setup fee and you can cancel any time from your account, so the first month is your trial. Your first posts are ready the next morning."

They say	You answer
"I already have a designer."	"Keep them for special designs. Post covers the daily posts and stories so your page never goes quiet, for less than a few designs a month."

Honesty rules: never promise a number of sales or followers; say Instagram captions can't be edited after posting (delete and post again); say Sinhala text on pictures should be checked; only use real customer results if the customer agreed.

10. After the yes: onboarding checklist

#	Step	Who
1	Payment through PayHere (plan activates automatically)	Customer
2	Customer adds Retexia's Facebook account to their Page (Content access) and links Instagram Business to the Page	Customer
3	Get the Page access token (Graph API Explorer > extend > me/accounts) and save it with post.admin_connect_page(...)	Retexia
4	Brand: logo, colours, tone, "About your business"	Customer or Retexia
5	Products with prices (and groups, e.g. "Cakes")	Customer or Retexia
6	Playlist: posts/stories a day, times, caption and picture languages	Customer
7	WhatsApp messages on, with their number	Customer
8	Press "Fill today" to see the first posts, check them together	Retexia
9	Day 3 call: "How do you like the posts? Anything to change?"	Retexia
10	Week 3: ask for a referral ("Do you know another business owner who'd like this?")	Retexia
